

#### GENERAL INFORMATION

To avoid any color difference due to printing limitation, feel free to request for the solid samples. To avoid any color variation among the panels produced in deferent lots, the total requirement for aproject should be placed in one order.

To avoid any reflection difference, especially for metallic,brush, mirror, sparkling and prismatics colors.the panels should be installed in the same directionin dicated by arrows on the masks.

#### PVDF

With Less gloss, we offer Kynar 500 or Hynar 5000 PVDF,with elegantly understated and tatseful colors inspired by the natural world, known for its color and gloss retention,chalking resistance and durability.

#### FEVE

With a excellent gloss range that's double the industry standard, FEVE fluoropolymer delivers a stunnning selection of the most brilliant colors available for architectural panels, FEVE is a combination of the advantages of PE coating and PVDF coating.

#### PE

PE enriches the architects'choices by an extensive range of colors, from quiet to very fresh colors. It also impresses the architects by a wide variety of gloss which is up to 95 degree. In addition, it is economy-considerate towards the materials that need frequent updates.
